# Italian know-how

Se capacità industriale e tecnologie avanzate sono la nostra forza, la maestria nel fare è la nostra anima, ciò che davvero ci distingue. Il saper fare rappresenta il cuore della nostra azienda: grazie ad esso tutti i nostri progetti prendono vitalità e slancio, a partire da una vocazione artigiana che viene ininterrottamente coltivata e perfezionata.

If industrial capacity and advanced technology are our strength, the know-how skill is our soul, what really sets us apart. The know-how is the heart of our company: thanks to it all our projects take vitality and outburst, from a handcrafted vocation that is continuously cultivated and perfected.

# Cordovado, Pordenone, Italy

L'Italia per noi non è solo un luogo di produzione ma va ben oltre: è il modo di pensare e di vivere che abbiamo abbracciato nel progettare, interpretare e innovare l'idea di arredamento fin dal 1987. Non solo Made in Italy quindi ma una perfetta sinergia tra maestria artigianale, creatività e tecnologia che rendono il nostro modo di lavorare il valore aggiunto in ogni nostra creazione.

Italy does not just define a place of production, but goes beyond: for us, it indicates a way of thinking and living, that we embraced in designing and innovating the idea of furniture since 1987. Not just Made in Italy, but a perfect synergy between hand - craft modeling, creativity and technology, that makes our working method the added value in each product.

Piombo  
Lead

I piani in cristalceramica provengono dalla tecnologia costruttiva del gres ceramico.

Realizzati con impianti ed attrezzature molto avanzate, uniscono allo spessore ridotto, un'elevata resistenza alle sollecitazioni meccaniche, ai prodotti chimici, all'usura, ai graffi, all'abrasione e resistono al gelo ed al fuoco.

Il processo di cottura a 1200 gradi di vari impasti di argilla, sabbia, silice ed altre sostanze naturali ne garantiscono l'assoluta originalità e massima riciclaggio ambientale.

Leggerissime imperfezioni di superficie e di lievi differenze cromatiche sono da considerare elementi naturali che ne accertano l'originalità e l'autenticità del prodotto.

The tops in cristalceramic come from construction technology of ceramic stoneware.

Made with highly advanced facilities and equipment, combine to the reduced thickness, high resistance to mechanical stresses, chemical products, wear, scratches, abrasion and they are resistant to frost and fire.

The cooking process at 1200 degrees of various mixtures of clay, sand, silica and other natural substances guarantees the absolute originality and maximum environmental recycling.

Slight surface imperfections and slight color differences are considered natural elements which ensure the originality and authenticity of the product.
